

Masonry apprenticeship is for individuals who pride themselves in their artistic abilities and wish to earn a good living while performing their craft. In an earn-while-you-learn structure, the apprentice learns on the job with his current employer and receives supplementary classroom and hands-on training from a qualified instructor. With a focus on basic masonry skills, the instructor communicates back to the employer about the apprentices accomplishments and progress.

Completion of the 3-year apprenticeship assures the graduate that he/she has knowledge to earn a good living anywhere in the world! This program is FREE — for students that are employed full-time by a Masonry Association of Florida or Masonry Contractors Association of Florida, Inc. member
